

Education

- Expected Spring 2027 **Bachelor of Science in Information Sciences + Data Science**, *University of Illinois Urbana-Champaign (UIUC)*, Urbana-Champaign, IL
- Relevant Areas of Study:** Data Science, Machine Learning, Database Systems, Artificial Intelligence, Information Systems, Data Visualization, AI Ethics, Web Content Strategy, Statistics, and Computational Research Methods.
- Selected Coursework:** Machine Learning; Data Visualization; Database Systems; Statistics for Data Science; Artificial Intelligence Ethics; Web Content Strategy and Management; Large Language Models / AI Project Course; Data Structures and Algorithms; Linear Algebra.

Research Experience

- May 2026 – Aug 2026 **Incoming Visiting Research Assistant**, *Shenzhen Institute of Big Data, Center for AI and Large Models*, Shenzhen, China, Advisor: Prof. Chenhao Ma
- Will conduct research on blockchain database systems under the supervision of Professor Chenhao Ma.
 - Study blockchain indexers and the transformation of low-level on-chain data into structured, queryable, high-level decentralized application data.
 - Explore blockchain data infrastructure for decentralized finance, on-chain intelligence, analytics dashboards, and database-backed blockchain applications.
 - Review and analyze emerging blockchain indexing frameworks and related database system designs.
 - Develop research background in raw on-chain data, DApps, DeFi systems, blockchain analytics platforms, and scalable data infrastructure.
- Nov 2025 – Present **Research Assistant, IS389: LLMs as Peer Reviewers**, *University of Illinois Urbana-Champaign*, Urbana-Champaign, IL
- Assist with a research project examining how large language models can function as structured peer reviewers.
 - Support the design and evaluation of prompt frameworks for generating consistent, risk-aware, and structured AI reviews.
 - Work with AI-generated review outputs related to dangerous power tools, focusing on safety, user experience level, potential harms, and responsible recommendation language.
 - Save and organize model outputs, response metadata, and evaluation materials to support transparency and reproducibility.
 - Contribute to discussions on large language model evaluation, responsible AI behavior, and the limitations of automated review systems.

Internship Experience

Jun 2026 – **Incoming Digital Media Marketing Intern, Transsion Holdings**

- Aug 2026
- Will support digital media and marketing-related work in a technology-focused corporate environment.
 - Assist with market research, digital communication, content analysis, and campaign-related tasks.
 - Apply information science, data science, and marketing knowledge to understand audience behavior, platform strategy, and digital engagement.
 - Gain industry experience in technology-driven consumer markets and digital media operations.

Leadership Experience

2025 – **Project Lead, Illinois Data Science Club, UIUC, Urbana-Champaign, IL**

- Present
- Lead and support student data science project teams through project planning, modeling, evaluation, and presentation stages.
 - Help students understand and apply machine learning methods, including regression, classification, feature engineering, model evaluation, and interpretation.
 - Provide feedback on project structure, data cleaning, modeling choices, baseline comparison, and result communication.
 - Support team coordination through project channels, GitHub repositories, workflow organization, and milestone planning.
 - Mentor students on how to connect technical modeling work with clear research questions, meaningful datasets, and reproducible project documentation.
 - Help guide interdisciplinary student teams working on applied data science problems across social, environmental, business, and public-interest domains.

Publications

Sep 2023 **Domestic Pension Industry: Trends, Themes and Research Trends– Visual Analysis based on CiteSpace knowledge Graph, *Advances in Economics and Management Research*, 7(1), 677, DOI: 10.56028/aemr.7.1.677.2023**

- Conducted a visual bibliometric analysis of domestic pension industry research using CiteSpace knowledge graph methods.
- Analyzed research trends, themes, hotspots, and frontier topics in the senior care and pension industry.
- Examined areas such as senior care services, pension finance, smart senior care, medical-nursing integration, policy development, artificial intelligence, and industrial integration.
- Used knowledge mapping to identify how China's pension industry research evolved in relation to demographic aging and policy priorities.

Honors & Awards

Fall 2024 – **Dean's List, University of Illinois Urbana-Champaign**

Fall 2025 Recognized for strong academic performance across multiple consecutive semesters (Awarded Fall 2024, Spring 2025, and Fall 2025).

2026 **I4I Scholarship**, *University of Illinois Urbana-Champaign*

- Received scholarship support for international academic field study.
- Used the award to support participation in a Costa Rica field study program focused on sustainability, biodiversity, environmental learning, and cross-cultural academic experience.
- Completed a final scholarship reflection connecting the field study experience with future academic and career development.

2023 **Silver Medal**, *Harvard International Review*

- Received Silver Medal recognition for research on the impact and use of artificial intelligence in the fracking industry.
- Investigated how AI technologies may affect industrial decision-making, operational efficiency, risk management, and ethical concerns in energy extraction.
- Developed research and writing experience in technology policy, industrial AI applications, and applied economic analysis.

Certifications

2025 **IBM Data Science Professional Certificate**, *IBM*

- Completed professional training in data science foundations, Python programming, data analysis, data visualization, SQL, and machine learning.
- Built applied skills in project-based data science workflows, including data cleaning, exploratory analysis, modeling, and communication of results.

Additional Academic Experience

2026 **Field Study in Costa Rica (ESE389)**, *University of Illinois Urbana-Champaign*

- Participated in a field-based environmental studies program in Costa Rica.
- Studied biodiversity, sustainability, conservation, and ecological systems through direct field observation.
- Developed an educational biodiversity project using original Costa Rican bird photography and visual science communication.
- Connected environmental learning with data organization, design, and public-facing educational materials.

Technical Skills

- **Programming & Data Science:** Python, pandas, NumPy, scikit-learn, XGBoost, Jupyter Notebook, data cleaning, exploratory data analysis, feature engineering, regression, classification, clustering, model evaluation, cross-validation, data visualization.
- **Database & Data Systems:** SQL, relational databases, data integration, database design, data provenance, reproducible data workflows, blockchain databases, blockchain indexing, on-chain data analysis.
- **AI & Machine Learning:** Machine learning, large language models, prompt engineering, AI evaluation, responsible AI, model output analysis, AI-assisted workflow design, OpenAI API, NotebookLM, Gemini, Codex.
- **Web & Tools:** HTML, CSS, Git, GitHub, VS Code, OpenRefine, technical documentation, project workflow organization.
- **Research & Communication:** Literature review, academic writing, bibliometric analysis, CiteSpace knowledge graph analysis, research question design, technical reporting, science communication, presentation design, data storytelling.
